

## **TECHNICAL REPORT**

### **ROYSON #79**

#### **Powder Metal Cleaning Detergent**

##### DESCRIPTION

Royson #79 is a concentrated powder formulated for use in removing oily residues in rotary barrels and vibratory equipment. The compound contains a blend of non-caustic alkaline builders and surfactants which provide excellent detergency. The product can be safely used on all metals and with all types of media. Solution of Royson #79 will quickly penetrate and remove grease, smut, and oily soils. It is excellent for restoring glazed or loaded media and is completely free-rinsing in nature.

##### OPERATIONAL DATA

Exact concentrations can not be accurately prescribed since much depends on the type of work and degree of soil to be removed. However, a concentration of one to eight ounces per gallon of water in the equipment usually provide the desired results.
